SUBJECT: DoD Captioning Style Guide

References: DoD Instruction 5040.02, “Visual Information (VI),” Oct. 27, 2011

The Associated Press Stylebook

PURPOSE

This publication provides a standard method of writing captions for DoD imagery. The guidance provided will help photographers, videographers and other VI professionals who produce or manage DoD imagery write and edit captions that are accurate, clear, concise and meet DoD style standards.

This publication is written for all producers, editors and users of visual information (VI). It demonstrates how to address military terms describing Service members, equipment, places and entities recorded by DoD camera operators, created by DoD graphic artists, or written about by DoD journalists. The DoD Captioning Style Guide is designed to supplement *The Associated Press Stylebook* and pertains specifically to DoD-specific issues not addressed by the AP. *The Associated Press Stylebook* remains the primary style reference for caption writers.

This publication applies to the Office of the Secretary of Defense, the Military Departments, the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the Office of the Inspector General of the Department of Defense, the Defense Agencies, the DoD Field Activities and all other organizational entities covered within the parameters of DoDI 5040.02.

Captioning Basics

The ABCs

To write an effective caption, remember the ABC's of captioning: accuracy, brevity and clarity.

Accuracy. Ensure every piece of information within the caption is accurate and complete. This also includes ensuring the captions are grammatically and stylistically accurate, and that they adhere to the guidance contained in this guide and the AP Stylebook. An accurate caption helps ensure an image is newsworthy, is of historical value and can be more easily retrieved from databases.

Brevity. When writing a caption, be certain every word is necessary to tell the story of the image. Captions must convey a great deal of information in a few short sentences, so they must be written concisely to maximize their effectiveness. Do not use 15 words where five will do.

Clarity. To be understood by the end user, a caption must be clear in both intent and expression. Select language to make certain the reader will understand what is happening in the image. Remember that the audience for DoD imagery is global. Construct captions that can be understood by a nonmilitary reader.

The 5 W's

When gathering information to include in a caption, keep the following questions in mind: who, what, when, where and why. All questions must be answered to accurately communicate the story of a still image or video clip.

Who Who or what is the subject of the image?

If the subject of a sentence is a person or persons, provide the rank, first and last name, title and military unit for each person. List units from smallest to largest (e.g., *U.S. Marines assigned to Kilo Company, 3rd Battalion, 1st Marine Regiment, 1st Marine Division*).

When identifying Service members, include the Service to which he or she belongs. This is not necessary when Service members are not individually identified. Every effort should be made to identify the subject of a photo. People appearing in the background need not be identified unless they are essential to the story of the image.

U.S. Air Force Tech. Sgt. John Brown inspects an aircraft.

U.S. Airmen prepare for an operational readiness inspection.

Do *not* include the names of minor dependents of military members. Do *not* include the names of American citizens, to include Service members, receiving medical treatment without the express written consent of the patient.

If the subject of the sentence is an object, provide the equipment name and model, name and ship hull number, or name and model of the aircraft or vehicle. Include both the name of the object (e.g., *C-5 Galaxy*) as well as what kind of object it is (e.g., *aircraft*).

A C-5 Galaxy aircraft taxis before takeoff.

The aircraft carrier USS Dwight D. Eisenhower (CVN 69) gets under way.

Note: Do not include a hyphen between the letters and numbers in the hull number.

To find the proper way to list a particular vehicle, weapon system or aircraft, refer to fact sheets available on Service-specific websites (see page 52). Also, see the list of selected vehicles in “Table 5. Selected Military Aircraft and Vehicles” on page 43 and the list of selected weapons in “Table 6. Selected Weapons” on page 44.

Active vs. Passive Voice

Active: U.S. Soldiers destroy confiscated ordnance.

Passive: Confiscated ordnance is destroyed by U.S. Soldiers.

What Describe the action captured by the imagery.

Use active voice when describing the action. When writing in active voice, the subject is doing something, while in passive voice, something is being done to the subject. To change from active to passive voice, make the object of the sentence (person or thing acting on

the subject) the subject and vice versa.

When describing the *what*, do not over describe the action; let the image speak as well. For example, look at the following image and read the two sample captions.

Incorrect: U.S. Navy Seabee Sparkole Dyeth, assigned to Naval Mobile Construction Battalion 3, **helps refurbish a wooden cabinet as she removes a screw** with a cordless power drill at the Nazareth Boys Orphanage in Victoria, Seychelles, Dec. 26, 2005.

Correct: U.S. Navy Seabee Sparkole Dyeth, assigned to Naval Mobile Construction Battalion 3, **refurbishes a cabinet** at the Nazareth Boys Orphanage in Victoria, Seychelles, Dec. 26, 2005.

In the first example, the *what* is “helps refurbish a wooden cabinet as she removes a screw” In the second, it is “refurbishes a cabinet.” Looking again at the image, nothing is lost by using the shorter description of the second caption. The information given in the first caption is also apparent in the image itself.

When Provide the date and, if pertinent, the time of day when the image was captured. Include the date within the caption. Do *not* use datelines, which are headers placed before the start of the caption, often containing the date and location of the image.

Use the following format: Aug. 21, 2011. Spell out months March through July and abbreviate months August through February.

When writing just a month and year with no day, do not abbreviate the month: “Feb. 27, 2011,” but “February 2011.”

Where Provide the geographic location as well as the name of the base, facility or organization, if applicable. Consult the *Associated Press Stylebook* “datelines” entry to determine if a city stands alone

Style Check: Dates

- Use month, day, year format.
- Do not include “on” before the date.
- Day of the week is not required.
- Do not use datelines.

in captions.

- If there is no city, give a region or general area (e.g., “near the Syrian border” or “off the coast of Southern California”).
- If the imagery was captured on a ship, provide the ship name as well as where it is moored or under way. For example: “off the coast of ...,” or “under way in the Pacific Ocean.”
- If it is an undisclosed location, state that within the caption and metadata.
- Do not use “here” in place of a location in a caption.

Spell out state names when they stand alone within the caption. Use abbreviations when paired with a city or base/installation. See “Table 2. State Names and Abbreviations” on page 38 for a list of state abbreviations. Do not use postal codes.

Why Explain the purpose of the event, exercise or operation depicted in the image. This gives context to the image and answers the question as to why the image matters. The explanation should be brief, in most cases no longer than one sentence. (See “Style Check: Sample Captions” on page 8.)

Constructing a caption

The first sentence contains the 5 W’s and is always written in the present tense using active voice. A caption describes the moment the image is captured, not what came before or after, so the first sentence will be written as if from that moment.

Subsequent sentences should almost always be written in past tense. This sentence gives background information on the image. It explains why the image is significant and places it in a larger context. When providing background information in a caption, include information that explains the significance of the *action in the image*.

Example:

U.S. Air Force Tech. Sgt. Art Brown demonstrates proper CPR techniques during his unit’s safety day July 5, 2011. *Brown’s unit was training in advanced first aid techniques in preparation for an upcoming deployment.*

Examine the following picture and sample caption:

U.S. Marines with the 31st Marine Expeditionary Unit board Landing Craft Utility 1627 in the well deck of the forward-deployed amphibious dock landing ship USS Germantown (LSD 42) Feb. 10, 2012, off the coast of Thailand. The Germantown was under way in support of Cobra Gold 2012. Cobra Gold is a regularly scheduled joint/combined exercise designed to ensure regional peace and strengthen the ability of the Royal Thai Armed Forces to defend Thailand or respond to regional contingencies. (U.S. Navy photo by Mass Communication Specialist 1st Class Johnie Hickmon/Released)

In the caption, the background sentences describe why the Germantown and the 31st Marine Expeditionary Unit were off the coast of Thailand (for exercise Cobra Gold). While this is important information, it does not give background information on the action in the image, which is Marines

boarding a landing craft utility. A more appropriate second sentence would explain why the Marines were boarding the craft. Presuming we know why, the caption could read:

U.S. Marines with the 31st Marine Expeditionary Unit board Landing Craft Utility 1627 in the well deck of the forward-deployed amphibious dock landing ship USS Germantown (LSD 42) Feb. 10, 2012, off the coast of Thailand. **The Marines were preparing to go ashore in Thailand as part of exercise Cobra Gold 2012.**

Include the photographer's credit and the release status of the image at the end of the caption. Use the following format: (U.S. Marine Corps photo by Sgt. John Doe/Released) or (U.S. Army photo/Released)

Additional rules of construction

Define all acronyms upon first use within the caption. Spell out the term, and then place the acronym in parentheses. Use only the acronym upon second use.

- **Do not use acronyms for terms used only once within the caption.**
- Do not use apostrophes when using a plural acronym. For example: *MREs*, not *MRE's*; *F-15s*, not *F-15's*.
- Refer to the Department of Defense Dictionary of Military and Associated Terms for official definitions of abbreviations and acronyms (see "Chapter 9, Additional Resources" on page 52). Acronyms need not appear in the DoD dictionary to be used in a caption.

Avoid the use of jargon. Explain terms and practices that are not commonly known outside of military circles. Remember to write for a nonmilitary audience. For example, do not use shorthand references to military units unless they have been previously defined within the caption.

Incorrect: 2-8 Infantry Regiment

Correct: 2nd Battalion, 8th Infantry Regiment

Do not editorialize. Stick to the facts as presented by the image and gathered at the scene. In the following example, the first caption contains editorializing.

Incorrect: An Iraqi family enjoys a picnic in a park near the Baghdad Zoo in the Karkh district of Baghdad, Iraq, March 30, 2007. Scenes like this one are becoming more prevalent in the city as life slowly returns to normal.

Correct: An Iraqi family shares a picnic in a park near the Baghdad Zoo in the Karkh district of Baghdad, Iraq, March 30, 2007.

When identifying people in an image, use the rule of three; provide the full name and rank and/or title of every person when there are three or fewer people in the image. It is not necessary to individually identify everyone should there be four or more people present, although there may be some cases (such as with high-level officials) where that would be appropriate.

Indicate position in a caption using commas, not parentheses. The following examples demonstrate two correct ways to indicate position.

U.S. Army Staff Sgt. John Brown, left, and Spc. Carl Anderson participate in a training exercise at Fort Pickett, Va.

From left, Secretary of Defense Leon E. Panetta, British Defense Secretary Philip Hammond and their aides meet at the Pentagon in Arlington, Va.

Do not quote people within the body of a caption. Direct quotations are best used in a press release, cover story or article.

Chapter 2

Grammar Review

Good captions are difficult to write without a solid foundation in the principles that govern sentence construction. The following review of basic grammar rules will help writers and editors produce clear, effective captions.

Sentence structure

A *sentence* is a group of words that contains a subject and a predicate. It is a complete thought that can stand alone. The *subject* is a noun or noun phrase, and is what the sentence is about. In captioning parlance, it is the “who.” The *predicate* is what is being written about the subject. This includes the verb, or action, of the sentence as well as other people or objects that the subject acts upon. When writing any sentence, begin with these building blocks: subject–verb–object. Place all supplementary information around this fundamental structure.

U.S. Soldiers patrol a neighborhood.

In the above sentence, the subject is “U.S. Soldiers” and the predicate contains both the action of the sentence, “patrol,” and the object of the action, “a neighborhood.”

Avoid sentence fragments. A *sentence fragment* is an incomplete sentence; it is usually either missing a subject or a verb or is not a complete thought. Fragments usually occur when captioning images that at first glance appear to show no action (for example, images of equipment, geographic locations, or local color). Assign an action, the “what,” to the image to ensure a complete sentence.

Fragment: The aircraft carrier USS Ronald Reagan (CVN 76) during a training exercise in the Pacific Ocean June 22, 2011.

Sentence: The aircraft carrier USS Ronald Reagan (CVN 76) participates in a training exercise in the Pacific Ocean June 22, 2011.

Avoid run-on sentences. A *run-on sentence* contains two or more independent clauses (word groups that can stand alone as a sentence) that are joined without either a semicolon or a comma and a linking word.

Run-on: The Sailors returned home from a six-month deployment and they celebrated when their ship moored pierside.

Fix the sentence with either a comma/linking word or a semicolon:

- The Sailors returned home from a six-month deployment, **and** they celebrated when their ship moored pierside.
- The Sailors returned home from a six-month deployment; they celebrated when their ship moored pierside.

Do not start a sentence with a number. The only exception to this rule is when starting a sentence with a year; however, avoid this when possible. Usually it can be fixed by adding a word at the start of the sentence.

Incorrect: 1st Marine Division is engaged in operations in the Anbar province of Iraq.

Correct: The 1st Marine Division is engaged in operations in the Anbar province of Iraq.

Punctuation

Apostrophes Use apostrophes to indicate possession or in contractions; do not use to indicate a noun is plural.

Incorrect: unexploded mortar's outside Kabul
Correct plural: unexploded mortars outside Kabul
Correct possessive: unexploded mortars' disposal date

With acronyms, use an apostrophe only to indicate a possessive. Add a lowercase "s" to make an acronym plural.

Plural: The COs met to discuss the mission.
Possessive: At the CO's request, they discussed the mission.

Remember that "its" indicates possession, while "it's" is a contraction of "it is."

Commas in a series The appropriate use of commas makes it easier to read a sentence. Comma placement is determined partially by grammar rules and partially through judgment.

Use commas to separate each element in a series. For example: *The flag is red, white and blue.* Use a comma before the conjunction (known as the serial comma) only when necessary to avoid confusion, such as in the following example: *The vessel performs utility boat functions such as submarine support, moving barges and floats, and personnel transfers.*

If any of the elements in a series contain commas, use semicolons instead. For example: *Secretary of Defense Leon E. Panetta; U.S. Army Gen. Martin E. Dempsey, the chairman of the Joint Chiefs of Staff; and Secretary of State Hillary Clinton met to discuss defense policy.*

Commas and clauses When joining two word groups that can stand alone as separate sentences, use a comma before a coordinating conjunction or use a semicolon with no conjunction. Do not use a comma if one of the clauses is dependent (does not stand alone as a complete sentence).

The building is finished, but it has no furniture.
The building is finished; it has no furniture.
The building is finished but has no furniture.

Use a comma after introductory clauses or phrases. Such clauses usually tell when, where, why or how the main action of the sentence occurs. For example: *After sharing a meal, the Airmen will resume training.*

Not every clause that appears to be independent requires a comma. For example: *Jake does not realize that his injury is serious and that he will have to undergo therapy to get better.*

Note that a ship's name is not a clause; do not separate it from the sentence with commas.

Commas and adjectives Separate coordinate adjectives with commas (coordinate adjectives modify the noun in the same way). For example: *She was a strong, loyal, well-trained Marine.* Each adjective describes the Marine.

Do not separate cumulative adjectives (cumulative adjectives must stay in order to make sense). For example: *Three large brown camels moved toward the convoy.*

How to tell the difference? Put the word "and" between each adjective and reverse the order of the adjectives. If the sentence still makes sense, use commas.

That/which Use "that" for essential information; do not separate with a comma. Use "which" for

nonessential elements; use commas to set off the clause. For example:

The Airmen needed a uniform that was wash and wear.
The Airmen needed new boots, which are expensive.

How to tell the difference? If you were to remove a restrictive element from a sentence, it would significantly change its meaning. Use this rule in order to know which one to use. In the first example above, the fact that the uniform must be wash and wear is essential to understanding the sentence. In the second, the fact that the boots are expensive is additional information; the essence of the sentence is that the Airmen need new boots.

Commas and titles Titles and other identifying adjectives listed after a name should be separated with commas; those listed before the name are adjectives and do not require commas.

Chief of Staff of the Army Gen. Raymond T. Odierno visits with troops.
Gen. Raymond T. Odierno, the chief of staff of the Army, visits with troops.

Commas and dates Do not automatically separate the date from the rest of the sentence. Comma usage is determined by what precedes the date (e.g., a state or a country). Remember to put a comma after the year in a complete date unless it ends the sentence.

U.S. Marines with Kilo Company, 3rd Battalion, 8th Marine Regiment conduct a security halt July 9, 2010, in Zaidon, Iraq.
Secretary of Defense Robert Gates holds a press conference at the Pentagon Dec. 5, 2010.
The marine vessel Blue Marlin enters Pearl Harbor, Hawaii, Jan. 9, 2011, with the Sea Based X-Band Radar aboard.

Commas and quantity Use a comma in numbers showing quantity (e.g., 1,200 troops, but 1200 hours).

Hyphens Use a hyphen to connect compound adjectives. A compound adjective is two terms that together act as one descriptor for a noun.

Note that the examples to the right are hyphenated only when used as compound adjectives. For example: *The troops were forward deployed.*

Use a hyphen to join some prefixes/suffixes and root words, such as anti-terrorism, anti-aircraft or DoD-wide.

If a unit number follows its unabbreviated name, then the name of that unit will generally be hyphenated in its abbreviated form.

Some examples of unit types that are hyphenated in their abbreviated forms:

- Navy and Marine Corps squadrons (VAW-77, HMH-464, etc.)
- Marine Corps combat logistics battalions (CLB-6, etc.)
- Naval mobile construction battalions (NMCB-1, etc.)
- Navy explosive ordnance mobile units (EODMU-1, etc.)

**Examples of
compound adjectives**

- Forward-deployed location
- Nuclear-powered aircraft carrier
- Rocket-propelled grenade
- Fixed-wing aircraft

Periods Use a period when abbreviating military titles. For example: *Tech. Sgt. James Cooper*. Refer to “Table 1. Military Rank Abbreviations,” page 36, for more information. When typing copy, use only one space after the period at the end of the sentence.

Mechanics

Prefixes Refer to *The Associated Press Stylebook* or *Webster's New World College Dictionary* for guidance on whether or not to hyphenate a word with a prefix. This section provides guidance for terms that commonly appear in DoD captions.

Common words with prefixes that do not take hyphens

- Resupply
- Noncommissioned
- Preflight
- Deworming
- Multinational
- Counterterrorism

In most cases, prefixes join with the root word without a hyphen (see box to the left).

Hyphenate words with the prefix “self-.” For example: *self-controlled, self-taught, self-defense*.

In most cases, hyphenate if the prefix ends in a vowel and the root word begins with a vowel (*de-ice, pre-exist, re-enlist*).

There are a few exceptions to these rules, such as: *cooperate, coordinate, pre-dawn, pre-position* (meaning to position personnel and equipment before acting), *pre-deployment, counter improvised explosive device* and *multi-Service*.

Take off/takeoff

Two F/A-18F Super Hornet aircraft prepare to take off.

A U.S. Air Force pilot prepares for takeoff.

Set up/setup

U.S. Soldiers set up for a medical operation.

U.S. Soldiers review setup procedures for a medical operation.

Suffixes Refer to *The Associated Press Stylebook* or *Webster's New World College Dictionary* for guidance on whether or not to hyphenate a word with a suffix.

In general, adjectives with the suffix “-wide” are one word. For example: *basewide*, not base-wide or base wide. When attaching the suffix to an acronym, use a hyphen, as in *DoD-wide*.

Compound words Several terms can be either one or two words, depending on the use. In most cases, when used as a verb, it is two words, and when used as a noun or an adjective, it is one word. These rules apply to several other common terms, such as stand down/standdown; line up/lineup; take out/takeout.

The terms onload and offload are one word in all cases. However, the words are jargon, so use “load” or “unload” instead whenever possible.

The terms check-in and checkout are treated differently. Use “check-in” as a noun and adjective, “check in” as a verb. Use “checkout” as a noun and adjective, but “check out” as a verb.

U.S. personnel go over check-in and checkout procedures.

U.S. personnel check in to their new units after completing check out of their equipment.

Capitalization

U.S. and foreign military Capitalize service branch names when referring to U.S. forces; do not capitalize when referring to foreign military. For instance, it is *U.S. Army*, but *British army*; *Iraqi police*, not *Iraqi Police*.

Capitalize the proper names of foreign military branches: *British Royal Air Force*, not *British Royal air force*. However, in accordance with the rule above, the common noun would be *British air force*. In the same vein, it is *Afghan National Army*, yet *Afghan army*.

Capitalize Soldier, Sailor, Airman, Marine and Coast Guardsman when referring to U.S. forces (*U.S. Soldiers*, but *Dutch soldiers*). However, “cadet” and “midshipman” are ranks, so capitalize them only when they’re used before a name.

Do not capitalize “airman” or “airmen” when referring to unnamed Navy personnel; in that case, the term is part of a generic rank/rate (e.g. *U.S. Navy airmen stand in formation*). However, when it’s used as part of a Sailor’s rating, it is capitalized (e.g. *U.S. Navy Aviation Ordnanceman Airman John Smith salutes an officer*.)

Capitalize a rank or title (such as *commanding officer*) when it precedes a name; but use lowercase when it follows a name, is set off by commas or stands alone.

U.S. Marine Corps Gen. John R. Allen, the commander of the International Security Assistance Force, arrives at Bagram Airfield, Afghanistan, March 22, 2012.

U.S. Army Capt. James T. Kirk, the commander of Alpha Company, visited an outpost every Tuesday.

Chairman of the Joint Chiefs of Staff Navy Adm. Mike Mullen speaks with Service members.

Proper nouns A proper noun names a particular person, place or thing. Capitalize all proper nouns, to include names of people, organizations, operations and exercises (e.g., *Sgt. Sharon Anderson*, *Department of Defense*, *New Dawn*, *Cobra Gold*).

Common nouns A common noun names categories of persons, places or things.

Capitalize common nouns only if they are part of a proper noun, such as a title or an organization (e.g., *U.S. Embassy*, *Operation New Dawn*).

Incorrect: They were overrun by Security Forces during an Operational Readiness Exercise.

Correct: They were overrun by security forces during an operational readiness exercise.

Incorrect: The Female Engagement Team leaders met with the new members of the Provincial Reconstruction Team.

Correct: The female engagement team leaders met with the new members of the provincial reconstruction team.

A general rule is if there is more than one of something, do not capitalize.

All caps Do not use all capital letters for anything but acronyms. Ship names, release status and other terms should all be regular text. For example:

The hospital ship USNS Comfort (T-AH 20) moors off the coast of El Salvador. The ship was on a four-month humanitarian mission. (U.S. Navy photo by Mass Communication Specialist 1st Class John Smith/Released)

Incorrect: Forward Operating Base (FOB)

Correct: forward operating base (FOB)

Correct: Forward Operating Base (FOB) Walton

Acronyms Acronyms are capitalized, but the terms to which they refer are only capitalized if they are proper nouns. Do not capitalize a term solely because it is assigned an acronym.

Chapter 3

Captioning Motion Imagery

When writing captions for motion imagery, all the rules in the preceding chapters on style and content apply. The descriptive information provided will necessarily be broader since the caption must describe more than a single image. Provide captions for the sequence and for each shot.

Caption information will appear on both the slate and a caption sheet such as DD Form 2537 (Visual Information Caption Sheet) or in a similar format (also known as a run sheet).

Slate

All video sequences should include a slate at the front of the sequence that contains:

- VIRIN
- Videographer name and rank
- Videographer contact information (e-mail and/or phone)
- The release status of the video: Released, Not Released, FOUO or Not Reviewed
- The name, rank and contact information of the releasing authority
- A brief description of the sequence (examples follow)

U.S. Soldiers with the 3rd Battalion, 17th Infantry Regiment collect biometric information from Afghan citizens in Kandahar province, Afghanistan, Feb. 7, 2010.

U.S. Sailors conduct flight operations aboard the aircraft carrier USS Ronald Reagan (CVN 76) while under way in the Indian Ocean July 21, 2011.

The placement of a slate on the video sequence does not replace the requirement to send a caption sheet with the video, either using DD Form 2537 or a text file.

A sample sequence caption slate:

2-12 Field Artillery On Patrol

DD Form 2537 - Visual Information Caption Sheet

To view a properly filled-in DD 2537, see Table 10. Sample DD Form 2537 on page 48.

Shot captions. Shot captions are shot-by-shot breakdowns of the video sequence. Include information that is pertinent only to that section of time code.

Place the time code in hour/minute/second format.

Include changes of camera field of view. Use the following abbreviations to indicate camera field of view: ES – Establishing Shot; LS – Long Shot; MS – Medium Shot; CU – Close Up; ECU – Extreme Close Up.

Place release status at the end of each shot caption.

Sequence caption. A sequence caption describes the contents of the entire video sequence. Clearly identify the documented activity. Include the date and place the video was shot.

Include the full name, rank, and title of the person or people featured only if included in the entire video sequence. Include the full name and model number of all featured equipment, vehicles, aircraft or ships if included in the entire video sequence. If not featured in the entire video sequence, place information about people, equipment, vehicles, aircraft and ships in the shot captions.

Briefly explain the purpose of the event, exercise or operation. Why is the documented action happening and/or why is it significant?

Include public release status and instructions at the end of the sequence caption.

Chapter 4

Still and Motion Imagery Metadata

All of the style guidance contained in this publication also applies to the metadata of motion and still imagery. It is important that this information is both complete and accurate to ensure that an image is searchable and of the utmost value to the end user.

Enter the metadata in the following manner: Excepting abbreviations, all entries should be in regular text, not in all capital letters. Table 3 on page 39 lists the metadata fields and their corresponding names and placement in common imagery management software programs. These same guidelines apply if you are using a video editing program that allows for the modification of video metadata.

Additionally, form DD 2537 must be filled out for all motion imagery, either electronically or on paper. A sample form can be found in Chapter 7, Table 10, on page 48.

Caption

Ensure that the caption is complete and adheres to the standards provided by this guide. Include the photographer credit line and the release status within the caption.

Operation/Exercise

This field should only be filled out with the name of an official operation or exercise. Official operations and exercises include *New Dawn*, *Enduring Freedom* and named exercises such as *Talisman Sabre* or *Cobra Gold*. Do not include “Operation” or “Exercise” in this field.

Photographer’s Rank/Name

Include the rank and full name of the photographer. Because of space limitations in this field, use an abbreviated rank (using the Service rank style of the photographer, i.e. SGT for an Army sergeant, A1C for an Airman 1st Class) to ensure that the full name of the photographer appears (e.g., *MC1 John Smith* or *Pfc Shannon Jones*).

Photographer’s Home Unit

Include the home unit of the photographer (e.g., *3rd Marine Division* or *1st Combat Camera Squadron*). Do not put the name of the shooter’s service (e.g. “U.S. Marine Corps”).

Photographer’s TDY/TAD Unit

Include the unit to which the photographer is assigned during the shoot (must be on official orders). If this information does not differ from that in the Photographer’s Home Unit field, or the photographer was not on official orders, leave this blank.

Visual Information Record Identification Number (VIRIN)

(Reference: Department of Defense Instruction 5040.02, Enclosure 6, October 27, 2011)

Assign each image a unique VIRIN. A VIRIN consists of 15 alphanumeric characters separated by hyphens into four fields organized in the alpha (A) numeric (N) format YYMMDD-A-AANNN-NNN.

Field one, the first six characters, is the date the imagery was shot, in YYMMDD format.

Field two, the seventh character, represents the Service of the photographer.

- A: Army, uniformed member or civilian employee
- D: Department of Defense, uniformed member, civilian employee, or contract employee of the Department of Defense not falling into one of the other categories
- F: Air Force, uniformed member or civilian employee
- G: Coast Guard, uniformed member or civilian employee

- H: Department of Homeland Security, not including Coast Guard
- M: Marine Corps, uniformed member or civilian employee
- N: Navy, uniformed member or civilian employee
- O: Any person not falling into another category, including foreign nationals
- S: Department of State
- Z: National Guard (either branch), uniformed member or civilian employee, *even when on federal active duty status or deployed overseas*

Field three is the photographer's VISION ID.

VISION ID

(Reference: Department of Defense Instruction 5040.02, Enclosure 7, October 27, 2011)

Field three (AANNN): In the case of all categories above except O, field three shall consist of the Visual Information Identification (VISION ID) of the image originator, which is assigned by DIMOC through the Defense Imagery website at www.defenseimagery.mil.

In the case of category O, such as a member of a foreign military not registered with a VISION ID, a civilian not affiliated with the Department of Defense, or for an image with undetermined or system-based origin, use the identifier **ZZ999** in field three.

Field four, the last three digits, identify unique images and are assigned in the order in which the images were shot.

Image Source

Enter the medium used to capture the image, either digital or film.

Caption Editor

Any person who reviews a caption should enter his or her name here, whether or not he or she made any changes to the caption or the metadata.

At each stage in the imagery management cycle, each new editor should enter his or her name in this field, replacing the previous name.

Base/Locale

Enter the city, base, ship, installation or other location at which the image was captured, not the location to which the photographer is assigned and/or deployed. For example, if the photographer is assigned to Camp Victory, but the image is captured in a Baghdad neighborhood, this field should read "Baghdad."

Should the location not be this specific, the field may be left blank. For example, for an image captured "near the Syrian border," filling out the country/area field will be sufficient.

State/Province

Enter the state or province in which the image was captured, if applicable.

Country/Area

Enter the country or area in which the image was captured. Areas will usually be bodies of water such as the Persian Gulf or regions such as the Arctic Circle.

Should it be an undisclosed location, enter that information here as well.

File Name

Assign each image a unique file name. **This should be the VIRIN** (e.g. 130103-A-ZZ999-001).

Date Shot

Enter the date the image was captured.

Command Shown

Enter the command where the photo was taken (USPACOM, USNORTHCOM, USEUCOM, USCENTCOM, USAFRICOM, USSOUTHCOM). In the case of Afghanistan or Iraq, ISAF or USF-I, respectively; for Combined Joint Task Force-Horn of Africa, use CJTF-HOA. **Do not** enter the local command or specific unit of the photographer.

Service Shown

Enter the most appropriate one-letter code for the Service depicted in the image, based on the main subject or subjects of the image. This information is essential for tracking imagery in the joint environment.

- A: Army
- C: Coalition
- D: DoD civilian (DoD civilians meeting with U.S. or foreign dignitaries fall under this as well)
- F: Air Force
- G: Coast Guard
- J: Joint/multi-Service (including active duty forces shown with a National Guard component)
- K: Foreign (service members or civilians, all from one nation)
- L: Multinational (service members or civilians from more than one nation)
- M: Marine Corps
- N: Navy
- O: Other (U.S. and/or foreign civilians not falling into one of the other categories)
- Z: National Guard (regardless of duty status, location or component)

Supplemental Category

This space contains the classification of the image, the classification authority and the contact information for the photographer at his or her current location. Enter *Unclassified*, *FOUO* or *Classified*. If the image is classified, enter the classification authority and downgrading schedule.

Public Release Instructions

Enter the release status of the image (Released, Not Released, Not Reviewed, classified imagery) as well as the name, duty position, phone number and/or E-mail address of the releasing authority. Note: The releasing authority will be a person's name and contact information; just a title or unit name is unacceptable.

- Released: The image has been sent to DIMOC and is cleared for public release.
- Not Released: The image has been sent to DIMOC, but is not cleared for public release.
- Not Reviewed: The image has been sent to DIMOC, but there is no release authority assigned to operation / exercise. Note: Photographer should send amplifying information on their plan to get imagery reviewed.
- Classified imagery: Submitted to DIMOC via appropriate means and only available to authorized personnel, i.e. FOUO, SECRET.

Keywords

A keyword is a word or phrase that signifies the meaning or main ideas of an image. The primary function of keywords is to improve accessibility of the imagery. Using appropriate keywords will ensure that an image is more searchable, making it more readily available to the end user. Separate keywords with a semicolon (USAF; Airman; F-16 Fighting Falcon; Aircraft)

For more information on keywording, see Chapter 5 on page 19 and Table 9. Sample Keywords on page 47.

Chapter 5

Keywording

Use the 5 W's to determine the most prominent elements within the image or video. Often, the who, what and where will be appropriate choices.

When selecting keywords for imagery, ask the following questions and choose keywords based on the answers:

- What is the message of the image or video?
- What person or object has the biggest impact?
- Why would someone want the image or video?
- What other major elements or concepts appear in the image or video but not in the caption?

Choose several keywords that best describe the visual content of the image or video. Using appropriate keywords will ensure that imagery is more searchable, making it more readily available to the end user.

A U.S. Marine with the 3rd Assault Amphibian Battalion patrols an improvised explosive device training trail during jungle warfare training in Colombia Aug. 10, 2010. The unit was deployed in support of Partnership of the Americas/Southern Exchange, a combined amphibious exercise with maritime forces from 10 nations. (U.S. Marine Corps photo by Lance Cpl. Ammon W. Carter/Released)

Example 1.

In Example 1, patrol is the primary action of the image. Therefore “Patrol” is a keyword. However, the concept of the image is training. “Training” is also a keyword. Inserting “patrol” as a keyword may appear redundant, since the word appears in the caption, but it allows for broader search capability and image accessibility if it is included.

Keywords for Example 1: Patrol; 3rd AAB; IED; M4 carbine; Training; Jungle warfare; USMC

Example 2.

A search looks for each individual word in a keyword for a match, therefore the keyword for an image of an F/A-18E Super Hornet aircraft needs to be its full technical name: F/A-18E Super Hornet. This ensures that

no matter the terms the user enters into a search (i.e. 18E, Hornet) the search will return results with

those words or phrases in the keywords. It is important to also include “aircraft,” otherwise a user searching simply for “aircraft” will not return all the appropriate images.

The keywords for Example 2: F/A-18E Super Hornet; F-22 Raptor; Aircraft

Keywords may actually be technical names or a phrase whose individual words are not separated by semicolons. For example:

Standard Format for keywords

1. Treat the keyword field similarly to the caption field; proper spelling and capitalization is important.
 - For example: M1A1 Abrams tank; USAID; Secretary of Defense
2. All technical names will be written as directed by the U.S. Military Services’ fact files and yearbooks.
3. Keywords are separated by semicolons (the final keyword does not get a semicolon after it).
 - For example: M1A1 Abrams tank; F/A-18E Super Hornet; Aircraft;

Correct	Incorrect
F/A-18E Super Hornet; Aircraft	F/A-18E; Super; Hornet; Aircraft;
M1A1 Abrams tank	M1A1; Abrams; Tank;
M14 Enhanced Battle Rifle	M14; Enhanced; Battle; Rifle;

4. Keywords may be phrases or full names and in these instances should not be separated.
5. The Photographer’s Service is a keyword, but only in its acronym/abbreviated form.
 - For example: USMC; USA; USN; USAF; USCG; RAF
6. Words that are NEVER keywords:
 - Photographer’s name (in any variation), unit or VISION ID
 - Release status
 - Classification status
 - Use of the image (i.e. publication)

Guidelines for selecting keywords

1. Consider and select from the broad categories list first (See the sample categories in “Table 9. Sample Keywords” on page 47).
2. What is the concept of the image?
 - Don’t forget to add the theme/message of the image.
3. What is in the image?
 - Vehicles? Weapons?
 - Technical names for all types of vehicles (aircraft, ships, tanks, etc.) and all weaponry are keywords.
 - Ship names (including the hull number), classes and types are keywords.
 - » For example: USS Dwight D. Eisenhower (CVN 69); Nimitz-class; Aircraft carrier;

4. Who is in the image?
 - Titles and occupation fields (not ranks) are keywords. This applies only to U.S. personnel.
 - » For example: Human Intelligence Collector; Drill Instructor; Logistics Specialist; Ship's Boatswain; Platoon leader; Designated marksman; Infantryman; Rifleman
 - There are four individuals whose title and name will always be keywords. These four people are the President, Vice President, Secretary of Defense and the Chairman of the Joint Chiefs of Staff.
5. Does the image represent an event?
 - Is the event an operation or an exercise?
 - If so, the name of either the Operation/Exercise is not a keyword. These names are to be entered in the Operation/Exercise metadata field.
 - If not, then the event's full name is a keyword.
 - » For example: 11th Annual Air Force Marathon;
6. Are there phrases, units, etc. that have acronyms/abbreviations that are not written in the caption? If so, the acronyms/abbreviations are keywords.
 - » For example: International Security Assistance Force is written in the caption but the acronym is not. "ISAF" is then a keyword.
 - » For example: The image is from Operation Enduring Freedom. OEF is then a keyword.
 - » For example: 6th Squadron, 1st Cavalry Regiment, 1st Brigade Combat Team, 1st Armored Division is used in the caption once. Therefore, "6-1 CAV; 1 AD" are keywords.

Chapter 6

Matters Of Style

The following chapter provides the correct style for the terms, equipment and so forth that are commonly misspelled or otherwise misused within DoD captions. The list is by no means comprehensive; if a term does not appear below, refer to *The Associated Press Stylebook* or *Webster's New World College Dictionary* for the appropriate style and spelling, the *National Geographic Atlas of the World* for place names, or to the Service-specific fact sheets for the correct spelling of aircraft, vehicles and equipment (see Chapter 9, "Additional Resources" on page 52).

abbreviations Only use abbreviations on second reference; the abbreviation must also be in parentheses after the first reference. Note: The only exceptions to this are Navy and Marine Corps aviation squadrons (see p. 35), NATO, SEAL, USO and abbreviations covered in the AP Stylebook.

Abu Ghraib Refers to a town, a palace, a prison and a chemical-biological laboratory. Specify which is referenced: the town of Abu Ghraib, the Abu Ghraib palace, the Abu Ghraib prison, the Abu Ghraib chemical-biological laboratory.

Afghan cities See "Table 7. Afghan provinces" on page 45 for the proper spelling for several major cities in Afghanistan.

all hands/all-hands Two words as noun: *The commanding officer called all hands to the meeting.* Hyphenate as adjective/compound modifier: *The Sailors attended the all-hands call.*

amphibious assault ship Do not capitalize, even when referring to a specific ship. For example: *U.S. Sailors and Marines man the rails of the amphibious assault ship USS Nassau (LHA 4).*

Other formal titles such as “Dr.,” “Sen.” or “Gov.” should be used where applicable. Do not use such titles on second reference unless necessary to differentiate two people with the same last name.

Colombia/Columbia The South American country is spelled Colombia, and the adjective is Colombian. Columbia is the proper spelling for the university, the former space shuttle and several U.S. cities and private-sector organizations.

colors When referring to the flag of the United States, “American flag” or “U.S. flag” are the preferred styles. Do not use in reference to the flags of other nations. High Mobility Artillery Rocket System Capitalize; the abbreviation HIMARS is appropriate on second reference.

high speed vessel The correct way to identify a high speed vessel in a caption is as follows: “high speed vessel Swift (HSV-2).” In subsequent references, HSV-2 is appropriate. Note: This is the only Navy-operated vessel type for which a hyphen is appropriate in the designator. See the entry for *Military Sealift Command*.

home port/homeported The term *home port* is two words, while *homeported* is one word.

The ship is headed for its home port of San Diego.

United States Ships (USS) and U.S. Coast Guard Cutters (USCGC) are not hyphenated; U.S. Naval Ships (USNS) with a classification beginning with “T” will receive a hyphen between the “T” and the remaining letters, but not between the letters and the numbers. U.S. Army vessel (USAV) hull numbers are hyphenated.

joint A multiservice activity, operation, organization, etc. See **combined**.

joint combined exchange training A multi-service and multi-national exchange of skills and knowledge between U.S. forces and their host nation counterparts.

U.S. Soldiers gather their gear after parachuting onto Landing Zone Tombstone.

The landing zone was not cleared, so the mission was aborted.

LCAC The correct term is *landing craft, air cushion*. Use lower case unless identifying a specific, numbered LCAC (e.g., *Landing Craft, Air Cushion 8*). The acronym is acceptable on second reference.

local Use this word only when it is necessary to differentiate a local leader or organization from a foreign one. Most of the time it will be an unnecessary word. In the following example the use of the word adds nothing to the meaning of the sentence, as is demonstrated by removing it.

U.S. Soldiers talk to local Iraqi citizens at a local market in Baghdad.

U.S. Soldiers talk to Iraqi citizens at a market in Baghdad.

In the following sentence, however, the word adds context:

Local leaders and charitable organizations have joined the U.S. effort to provide disaster relief to affected areas.

locations Follow AP style rules when listing geographic names, directions and regions. The names of airports, hospitals, etc., should not be listed like cities. For example: *Beaumont Airport, Texas*. There is no such city in Texas, so the correct way to refer to this in a caption is *Beaumont Municipal Airport in Beaumont, Texas*. Do not write “here” in place of a location name.

loose/lose “Loose” means not tight, while “lose” means to misplace something or to fail to win.

The lug nuts were loose, causing the Humvee to lose its wheels.

man the rails

marine vessel (MV) The acronym is acceptable on second reference.

mass casualty/mass casualty exercise No hyphen.

medical civic action program (MEDCAP) The acronym is acceptable on second reference.

military decorations Military decorations and awards are never “won.” Use terms such as *earned*, *received*, or *presented with*. A person who holds an award is a *recipient*, not a “winner.”

U.S. Army Staff Sgt. Salvatore Giunta, a recipient of the Medal of Honor, smiles as he and his family meet with Secretary of Defense Robert M. Gates at the Pentagon in Arlington, Va., Nov. 17, 2010. Giunta received the nation’s highest military honor for rescuing two members of his squad during an ambush on his platoon in Afghanistan in October 2007.

military operations on urban terrain (MOUT) MOUT is an out-of-favor term; the preferred term is urban operations (UO). The term MOUT is still in limited use, however, and may be used when referring to a specific “MOUT city,” or “MOUT site,” but should not be used in the following senses: “... train for military operations on urban terrain ...” or “... conducts military operations on urban terrain training.” See **urban operations**.

Military Sealift Command Ships operated by the Military Sealift Command carry the designation “USNS” (United States Naval Ship) and are not commissioned ships. Also, they are crewed mostly by civilians. Some MSC ships have military personnel assigned to carry out specialized military functions such as communications and supply operations. MSC ships carry the prefix “T-” before their normal hull numbers. For example: *The salvage ship USNS Grasp (T-ARS 51) was formerly a U.S. Navy ship designated ARS 51*. See **hull numbers**.

military titles Abbreviate all military titles in accordance with AP style. On second reference, drop the title and use just the last name. See Table 1. Military Rank Abbreviations on pages 36-37 for the appropriate abbreviations for each rank.

modular airborne firefighting system Do not capitalize. MAFFS is acceptable on second reference.

MRAP The correct term is *mine-resistant, ambush-protected vehicle*. The appropriate use, with acronym, is *MRAP vehicle*. On first use, spell it out, and do not capitalize. Also: mine-resistant, ambush-protected all-terrain vehicle, second reference M-ATV.

U.S. Airmen load mine-resistant, ambush-protected (MRAP) vehicles Aug. 27, 2011. The MRAP vehicles were to be transported to the U.S. Central Command area of responsibility.

MRE The correct term is either *meal, ready to eat* or *meals, ready to eat*. The acronym is MRE (singular) or MREs (plural).

museum ships If a museum ship is mentioned in a caption, please use the official name of the museum or write it as you would any other decommissioned ship.

Table 4. Force Structure

The following table provides the basic force structure of the four Services, listing units from smallest to largest groupings of Service members. Other organizational groupings do occur within each Service. This table is designed only to act as a guide to help the writer list unit designations within a caption. Only capitalize elements (brigade, platoon, wing, etc.) when used as part of a unit name.

Table 4. Force Structure (continued)**U.S. Navy**

The Navy does not list unit designations in the same way as the other Services. While a Sailor may be assigned to a ship, which belongs to a carrier strike group, which falls under a fleet, all of those levels are not listed within a caption.

Identify the ship or onshore unit to which a Sailor is assigned. Also identify lower-level unit demarcations, such as squadrons or detachments.

Identify the strike group to which a ship is assigned only if it is currently deployed with the strike group.

Chapter 8

Guidelines and Policy on Disclosure of Manipulation of Imagery

The Department of Defense has a responsibility to maintain total credibility when sharing information with the American people, and that extends to ensuring DoD imagery meets or exceeds the highest ethical standards used by the news industry.

Imagery products in the media – stills and video – have come under increasing scrutiny over the past decade after several notable cases of image manipulation and/or alteration. Media professionals, photography experts, critics of the military and the general public are paying particular attention to DoD images after a couple of notable incidents in which the DoD's credibility was thrown in doubt.

In one incident, an image of a general officer seated at a desk was altered to depict an American flag behind her, rather than the wall of the office she was in. In another case, the head of a Soldier in one picture was cut and pasted onto an image of another Soldier.

Both of these altered images were submitted to a major news organization for distribution; in both cases, the organization detected the alteration and reported on that fact. As a result, there was a period in which many civilian media outlets would not accept any imagery from the DoD or the services because of these incidents.

Any imagery that is altered to deliberately deceive others, or otherwise misrepresent a person, scene or event, is prohibited.

DoD Instruction 5040.02, Enclosure 10, Section 4 states, in part: *“The undisclosed modification or enhancement of official DoD imagery by persons acting for or on behalf of the DoD is prohibited. Any and all image modification or enhancement for any purpose must be disclosed in the caption data so that the image does not mislead or deceive.”*

(EXCEPTIONS: Standard color and contrast adjustments do not need to be disclosed. Occasionally, there will be images that show Personally Identifiable Information (PII), such as identification tags or access badges. It is permissible to obscure such information using digital means, *as long as it is made clear within the caption of the image* that portions of the image were blurred for security or privacy concerns.)

As imagery technology continues to advance, it is imperative that DoD Visual Information professionals maintain the highest ethical standards in terms of presenting images that accurately depict the scene or image seen by the camera eye.

There are numerous ways to manipulate an image in a darkroom or using digital means; while the end product may accurately represent a theme or subject, it's still not what was seen by the camera eye at the time the shutter was clicked.

The responsibility lies with the photographer - and anyone else involved in the processing of an image - to disclose manipulations above and beyond standard color corrections.

Rule of thumb: *If you think you may need to disclose manipulation techniques used on an image, then do so.*

Photo illustrations and alterations

Photo illustrations are images that have been manipulated beyond standard color correction, whether for aesthetic purposes or to highlight a theme. Photo illustrations also include images that have been retouched, filtered or are manipulated in any other way; images with cutouts, collages,

panoramas, frames or added text/graphics are also considered photo illustrations.

HDR (High Dynamic Range)

HDR images are single images compiled from several images taken at various exposure levels; the result is an image that highlights both dark and light areas of the image. While HDR imagery can be visually stunning, it is a form of manipulation, and must be disclosed accordingly. NOTE: Each component image of an HDR image shall also be sent to DIMOC simultaneously with the HDR image, if the camera allows for it (some newer cameras automatically save the various exposures as a single image file).

Hipstamatic, Instagram, other instant “apps”

There are a wide range of applications, or “apps,” for iPhones and other electronic devices that allow a shooter to take an image and automatically filter it to resemble, for example, an older Polaroid, Kodachrome or sepia-toned shot. Although it usually requires little or no added effort from the photographer, the saved image is fundamentally altered from what the camera actually saw. Use of such apps must be disclosed.

Proper disclosure of manipulations

In short, if an image has been manipulated above and beyond anything but the most basic color corrections, it must be labeled as such after the caption, as seen in the examples below:

Caption text. (U.S. Army photo illustration by Sgt. Mike Smith/Released) (This image was created using high dynamic range techniques)

Caption text. (U.S. Air Force photo illustration by Tech. Sgt. Frank J. Morales/Released) (This image was created using Instagram)

Caption text. (U.S. Marine Corps photo illustration by Gunnery Sgt. Steve Williams/Released) (This image was manipulated using multiple filters and dodging and burning techniques)

Caption text. (U.S. Coast Guard photo illustration by Petty Officer 1st Class Megan O’Brien/Released) (This image was manipulated by adding a unit logo to the upper left hand of the frame)

Caption text. (DoD photo illustration by William F. Morgan/Released) (This image was manipulated by adding text at the top and bottom of the image)

NOTE: The disclosure should also appear in the Public Release Instructions (PRI) field of the metadata. This demonstrates the releasing authority is aware of the manipulations in the image being sent to DIMOC.
