MEMORANDUM FOR ALL MAJCOM-FOAs

FROM: AF/A1

SUBJECT: Suspension of Official Physical Fitness Assessments in Response to Coronavirus Disease 2019

Effective immediately, official physical fitness assessments are suspended for the Total Force until 1 October 2020 to mitigate both exposure to and the spread of COVID-19 amongst our force. When testing resumes, the Air Force will take a systematic approach to reintegrating official physical fitness assessments. In the meantime, installations should continue to coordinate with public health officials and update existing local policies and procedures in accordance with Centers for Disease Control and Prevention, Environmental Protection Agency, and local and state or host-nation guidelines. All policies and procedures should reinforce physical distancing, use of personal protective equipment, Airmen health and personal hygiene, and cleaning, sanitizing and disinfecting work spaces and common areas. Airmen remain our top priority, and we will ensure their health and safety as we maintain our force readiness posture.

Further detailed guidance is provided in attached, *Interim Policy Guidance for Physical Fitness during the COVID-19 Outbreak*. Questions pertaining to this memorandum can be addressed to usaf.pentagon.af-a1.mbx.af-a1.ppp-workflow@mail.mil.

This memorandum is effective through 30 September 2021 unless rescinded sooner or superseded by other policy.

A handwritten signature in black ink, appearing to read "B.T. Kelly", is positioned above the name and title.

Interim Policy Guidance for Official Physical Fitness during the COVID-19 Outbreak

Subject to local health conditions, Air Force physical fitness assessments shall resume 1 October 2020, and the following actions pertaining to all official physical fitness assessments apply:

- Commanders shall begin assessing Airmen's fitness on 1 October 2020 contingent upon base fitness centers being reopened and local state/country travel and movement restrictions being lifted.
- If fitness centers remain closed and local movement restrictions remain in place, commanders may choose to delay physical fitness assessment resumption beyond 1 October 2020 until safe conditions are available.
- An Airmen's next scheduled fitness assessment will be based on the date of their last official assessment and fitness category (see attachment 2 for full schedule).
- In order to maintain the health and safety of the force as we resume testing, the abdominal circumference component will be temporarily suspended through 1 October 2021 or until further notice. During this period, all Airmen will receive a temporary, one-year abdominal circumference component exemption, and the next scheduled test date will be based on the overall fitness score (see attachment 2 for full schedule). This one-year temporary abdominal circumference exemption will take precedence over any other shorter term temporary abdominal circumference exemptions.
- The annual height and weight measurements taken in conjunction with the fitness assessment will be temporarily suspended until further notice in order to preserve the health and safety of the force.
- Physical training leaders augmenting the Fitness Assessment Cell may test members from within their same unit to help provide Commanders with capacity options.
- Commanders should use the four-month delay to purchase appropriate equipment (i.e., toe bars) to aid in physical distancing and administration of official physical fitness assessments in a safe and healthy environment.

Actions pertaining to Airmen who are non-current, overdue or who have an unsatisfactory official fitness assessment:

- Airmen who are non-current or have an unsatisfactory official physical fitness assessment will not be required to test before the authorized 42-day reconditioning period has expired. The first day of the 42-day reconditioning period begins on 1 October 2020.
- However, Airmen may request a waiver to the 42-day reconditioning requirement with commander approval, in order to test early and meet promotion eligibility or other requirements but may not be forced or directed to do so.

Before resuming official physical fitness assessments, commands should:

- Perform local risk assessments in consultation with Public Health authorities.
- Adhere to current Centers for Disease Control and Prevention, Environmental Protection Agency, Force Health Protection and local and state official's guidance.

- Establish and implement appropriate physical distancing procedures as it pertains to official fitness assessments and ensure they are rigorously followed.
- Elevate any risk to force through existing processes and procedures.
- Procure appropriate personal protective equipment for health and safety (gloves, masks, and sanitizing supplies).
